

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Rathbone Global Opportunities Fund (I Acc)

### A sub-fund of Rathbone Unit Trusts

Fund Manager: Rathbones Asset Management Limited  
I Acc ISIN GBOOB7FQLN12

### OBJECTIVES AND INVESTMENT POLICY

We aim to deliver a greater total return than the Investment Association (IA) Global sector, after fees, over any five-year period. Total return means the return we receive from the value of our investments increasing (capital growth) plus the income we receive from our investments (dividend payments). We use the IA Global sector as a target for our fund's return because we aim to achieve a better return than the average of funds that are similar to ours.

We compare our asset allocation to the FTSE World Index to give you an indication of how our fund is positioned against the global stock market.

We will invest at least 80% of our fund in global shares, with the remainder in cash, short-term deposits and UK government debt. We actively manage our fund, which means we can choose what we invest in as long as it's in line with the investment objective and policy. Because of this, our fund's performance can diverge significantly from its benchmarks over shorter periods of time and therefore isn't appropriate for investors who plan to withdraw their money within five years.

Our fund is designed for investors with a basic knowledge of shares who seek growth. You should intend to invest for longer than five years, understand the risks of our fund and have the ability to bear a capital loss.

You can buy and sell units on each business day of the fund between 9am and 5pm.

The fund offers accumulation units (units in which any dividends received are added to the unit price).

### RISK AND REWARD PROFILE

These numbers rate how the Fund may perform and the risk of losing some or all of your investment. In general the potential for higher returns also implies a higher level of risk. However, the lowest category (1) does not mean a risk free investment. The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time.

This indicator is a measure of the fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this fund reflects the following:

As an asset class, shares have greater risk than either:

- bonds
- money market instruments.

The value of investments in the fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the fund may increase significantly, and in addition, the fund may be subject to the following risks:

**Operational risk:** We rely on complex systems to ensure that trades are completed, our fund's assets are accounted for and that you can buy or sell our fund. If our systems fail, you could be inconvenienced or lose money.

**Liquidity risk:** Some assets become hard to sell at their expected price, especially in times of market stress. This could mean we have to sell assets below their expected price resulting in a loss. In extreme circumstances, we may suspend the fund to protect your investment, resulting in you being unable to access your money.

**Counterparty risk:** A company that we deal with may renege on its obligations, costing you money.

**Management risk:** People make the investment decisions for our fund. If they make unfavourable decisions, you could lose money.

**Currency risk:** We own assets valued in a currency other than sterling. Changes in the price of foreign currencies can result in gains or losses, even if underlying asset prices stay the same.

**Concentration Risk:** The fund invests in a small number of investments. This means that the performance of a single stock within the portfolio has a greater effect on the value of the fund. This can result in large gains or losses based on the performance of a single stock.

## CHARGES FOR THIS FUND

The fund manager receives an annual fee, which is included in the ongoing charges shown below. Ongoing charges are the same for all investors in the same class. The charges shown below are based on actual fees and expenses as at the Fund's current year-end or semi-annual period.

Entry Charge	none
Exit Charge	none

**This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.**

Ongoing Charges 0.77%

### Charges taken from the Sub-Fund under certain specific conditions

Performance Fee none

The Fund does not charge entry or exit charges.

For more information about charges, please see the "Charges" section of the fund's Prospectus, available by calling the Information Line or emailing [RAM@Rathbones.com](mailto:RAM@Rathbones.com).

## PAST PERFORMANCE

Basis of performance: Price performance based upon bid to bid prior to 21 January 2019 and single price (mid) thereafter.

Past performance is reported on a full calendar year basis.

Fund inception: 9 May 2001. I-class units were launched 1 March 2012.

Past performance should not be seen as an indication of future performance.
